| Geography B Paper 2: UK Geographical Issues | | | | | | |
| You must have: Calculator | Total Marks | | | | | |

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions in Sections A and B.
- In Section C1 answer **either** Question 8 **or** Question 9.
- In Section C2 answer **either** Question 10 **or** Question 11.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- Where asked you must **show all your working out** with **your answer clearly identified** at the **end of your solution**.

Information

- The total mark for this paper is 94.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*
- The marks available for spelling, punctuation, grammar and use of specialist terminology are clearly indicated.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

Pearson

SECTION A**The UK's Evolving Physical Landscape**

Answer ALL questions. Write your answers in the space provided.

Some questions must be answered with a cross in a box ☒. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☒.

- 1** Study Figure 1 which is a diagram of changes to a landscape in southern England.

Figure 1

- (a) Identify which **one** of the following is the most likely reason why this landscape has changed.

(1)

- ☐ **A** Weathering
- ☐ **B** Volcanic eruptions
- ☐ **C** Sea-level rise
- ☐ **D** River erosion

- (b) Identify which **one** of the following is a weathering process.

(1)

- ☐ **A** Freeze-thaw
- ☐ **B** Abrasion
- ☐ **C** Deposition
- ☐ **D** Slumping

(c) Explain **one** impact of glaciation on the landscape of the UK.

(2)

(Total for Question 1 = 4 marks)

P 5 6 2 4 0 A 0 3 4 0

Coastal Change and Conflict

- 2 (a) Study Figure 2 which shows waves on the coastline of Cornwall.

Figure 2

- (i) State the type of waves shown.

(1)

- (ii) Identify which **one** of the following is the most likely cause of waves such as these.

(1)

- ☐ A a long fetch across the Atlantic Ocean
- ☐ B soft rocks that are easily eroded
- ☐ C a short fetch across the North Sea
- ☐ D a period of very cold weather

- (b) Explain **one** reason why there may be an increase in the frequency of storms in the future.

P 5 6 2 4 0 A 0 5 4 0

River Processes and Pressures

3 Study Figure 3 which is a photograph of the River Severn in Shropshire.

Figure 3

(a) Identify which **one** of the following is the best description of the river landforms shown.

(1)

- ☐ A Waterfalls
- ☐ B Rapids
- ☐ C Meanders
- ☐ D Deltas

(b) Explain **one** way in which rivers transport their load.

SECTION B**The UK's Evolving Human Landscape**

Answer ALL questions in this section. Write your answers in the space provided.

Some questions must be answered with a cross in a box ☒. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☒.

- 5 (a) Study Figure 5 which shows which age groups are dominant (in the majority) in different areas of the UK.

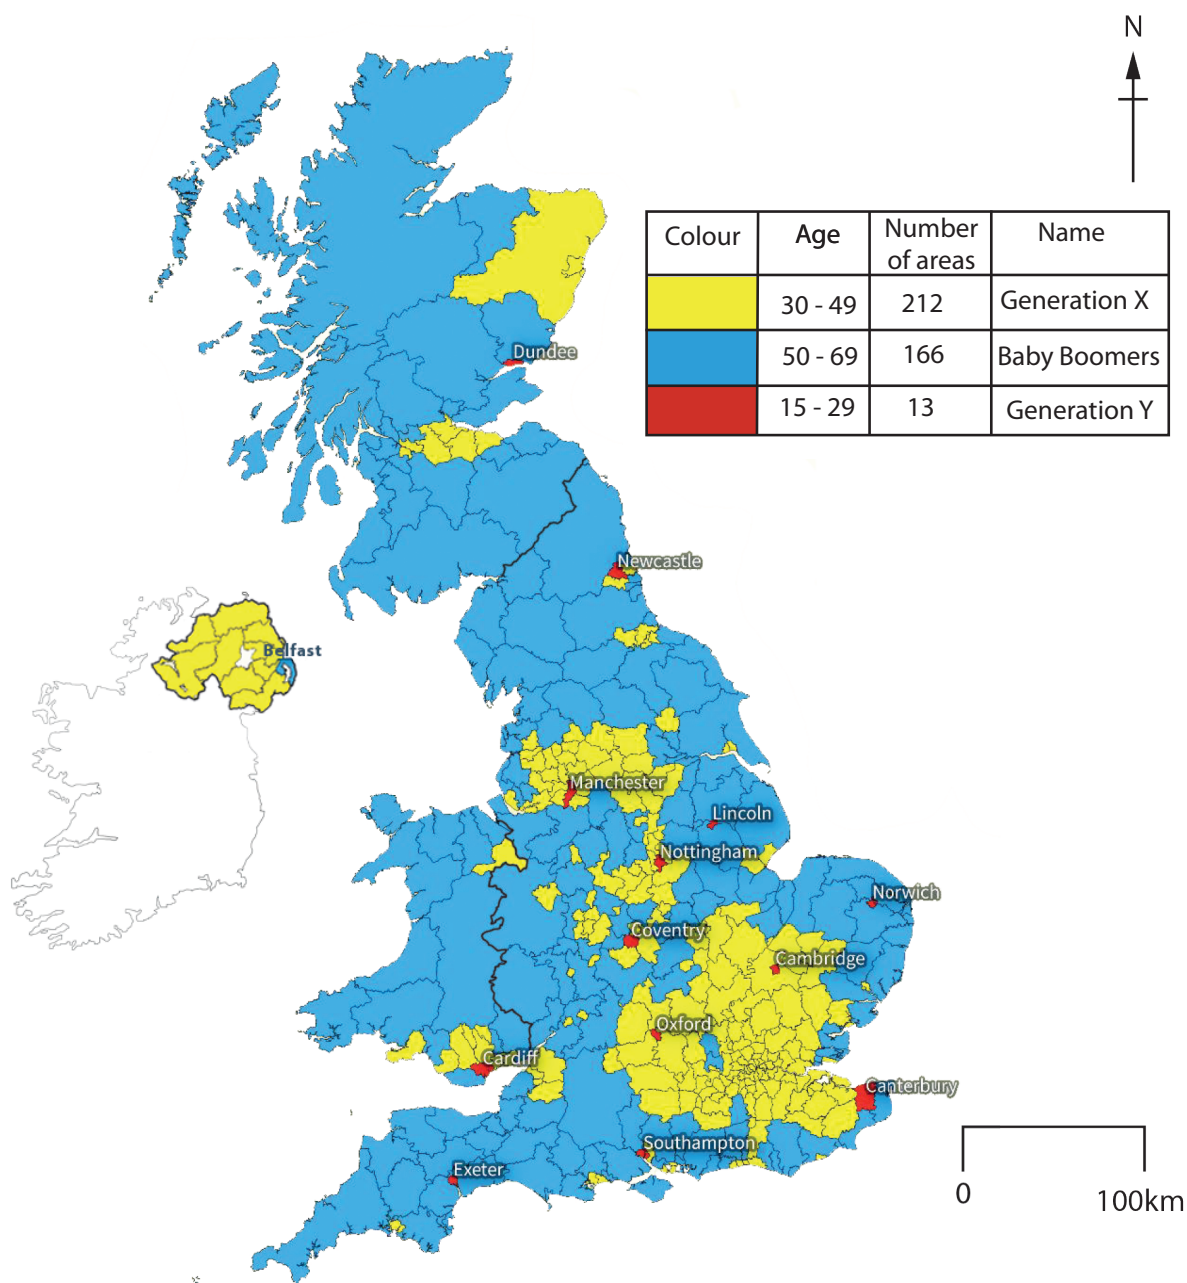

Figure 5

(i) Identify which **one** of the countries of the UK is dominated by Generation X.

(1)

- ☐ **A** Northern Ireland
- ☐ **B** England
- ☐ **C** Scotland
- ☐ **D** Wales

(ii) Calculate the percentage of areas dominated by 'Baby Boomers'.

Answer to **one** decimal place.

You must show your working in the space below.

(2)

..... %

(iii) State **two** reasons for the distribution of the areas dominated by Generation Y.

(2)

1

.....

2

.....

(b) Explain **one** reason for the growth of tertiary employment in the UK.

Dynamic UK Cities

6 (a) Study Figure 6 which is a map of a UK city showing building height.

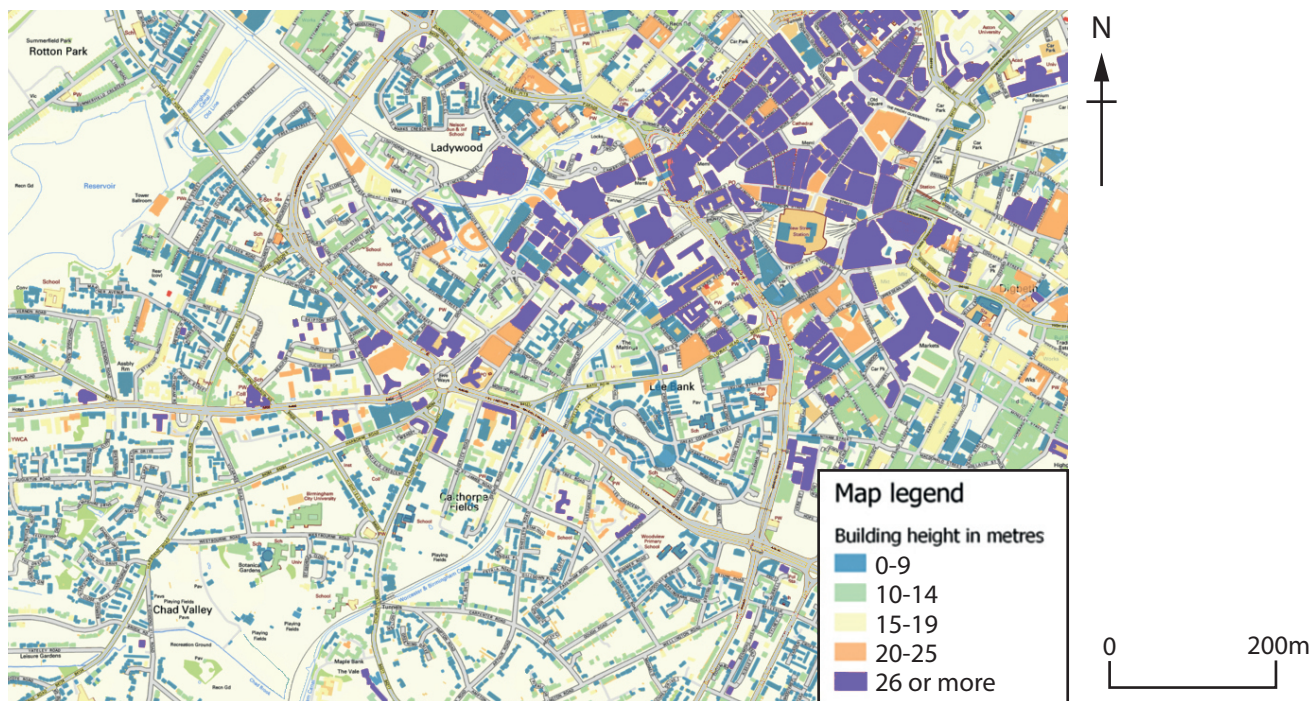

Figure 6

(i) Identify which **one** of the following is most likely to be the location of the city centre.

(1)

- ☐ **A** south-west corner of the map
- ☐ **B** north-west corner of the map
- ☐ **C** centre of the map
- ☐ **D** north-east corner of the map

(ii) Identify the most likely function of buildings which are under 10 metres in height.

(1)

(iii) Explain **one** reason why building height varies in urban areas.

(2)

- (b) For a UK city that you have studied, explain **one** positive and **one** negative effect of regeneration.

Named UK city

(4)

Positive effect

- (d) In 2017 a group of students carried out a questionnaire in three different urban areas, one in the city centre, one in the suburbs and one in a rural settlement just inside the city boundary.

The interviews were conducted between 13:00 and 15:00 on a Thursday afternoon by asking people in the three different areas;

- (a) if they were residents in that location and
(b) if they would be prepared to take part in a survey.

The students interviewed 30 residents in total, 13 in the city centre, 10 in the suburb and 7 in the rural settlement just inside the city boundary.

The residents were asked to identify the **three** most important factors for them when they chose their current residence. The results are shown below in Figure 10.

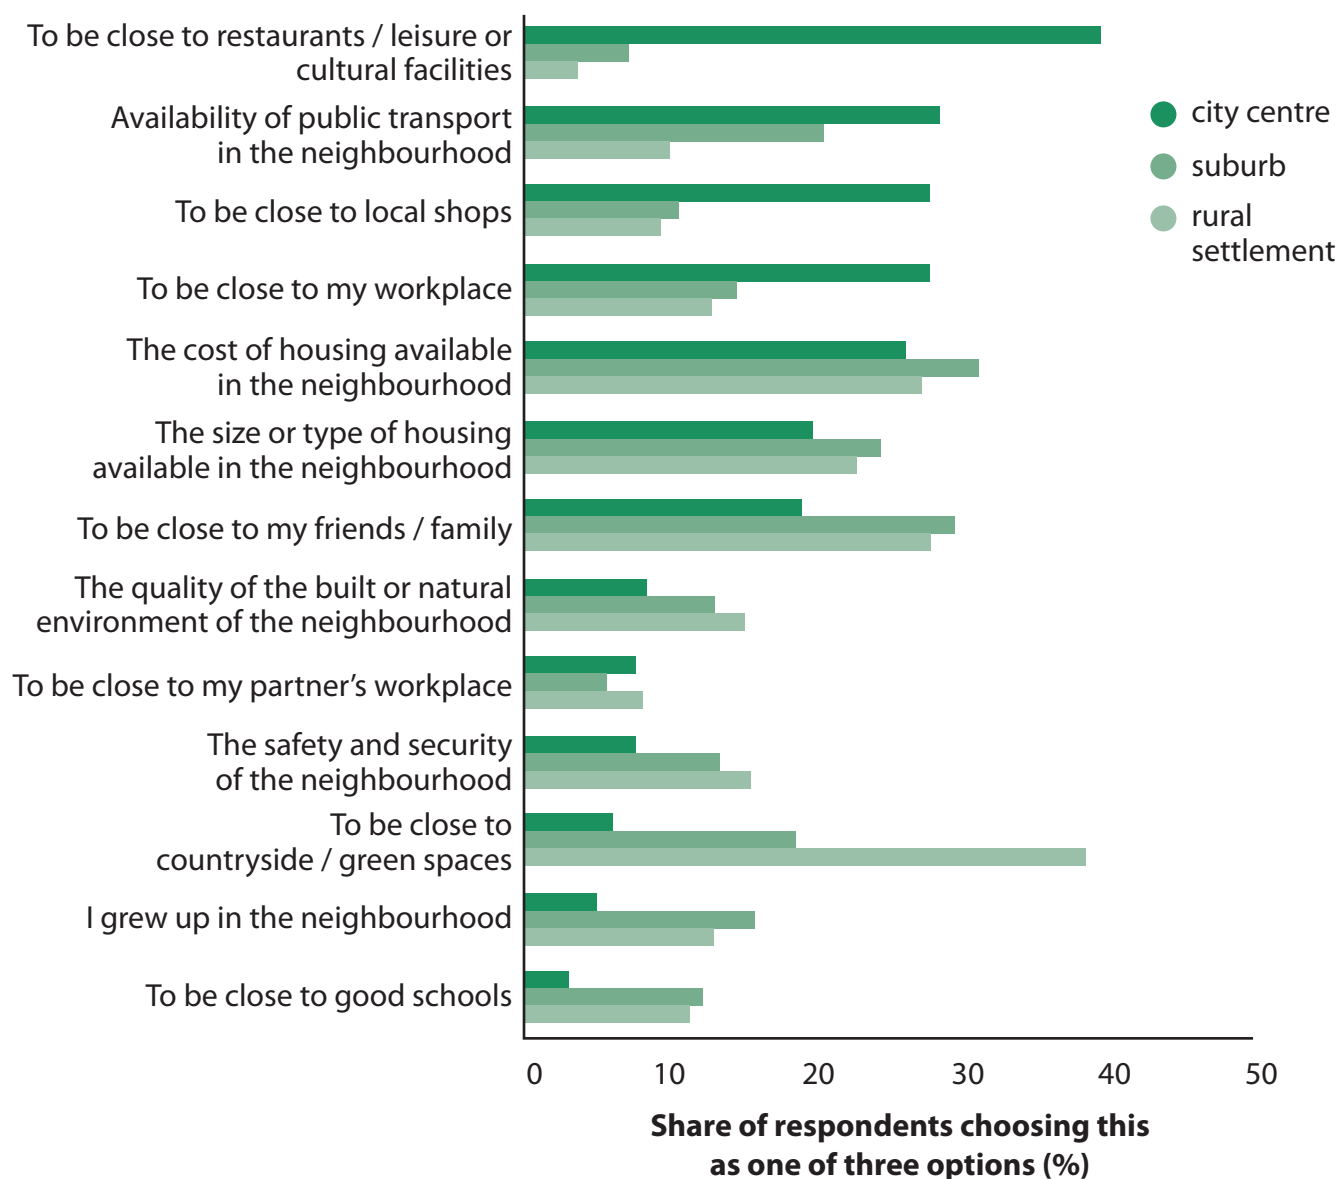

Figure 10

The students concluded that housing cost and closeness to family and friends were the most important factors overall.

Assess the evidence for this conclusion.
