Mark scheme

November 2019

Version: 1.0 Final

19bG8300/2F/MS

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

Glossary for Mark Schemes

GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Mathematics papers, marks are awarded under various categories.

If a student uses a method which is not explicitly covered by the mark scheme the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

M	Method marks are awarded for a correct method which could lead to a correct answer.
A	Accuracy marks are awarded when following on from a correct method. It is not necessary to always see the method. This can be implied.
B	Marks awarded independent of method.
ft	Follow through marks. Marks awarded for correct working following a mistake in an earlier step.
SC	Special case. Marks awarded for a common misinterpretation which has some mathematical worth.
M dep	A method mark dependent on a previous method mark being awarded.
B dep	A mark that can only be awarded if a previous independent mark has been awarded.
oe	Or equivalent. Accept answers that are equivalent. eg accept 0.5 as well as $\frac{1}{2}$
[a, b]	Accept values between a and b inclusive.
[a, b)	Accept values $a \leq$ value $< b$
3.14 …	Accept answers which begin 3.14 eg 3.14, 3.142, 3.1416
Use of brackets	It is not necessary to see the bracketed work to award the marks.

Examiners should consistently apply the following principles

Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

Responses which appear to come from incorrect methods

Whenever there is doubt as to whether a student has used an incorrect method to obtain an answer, as a general principle, the benefit of doubt must be given to the student. In cases where there is no doubt that the answer has come from incorrect working then the student should be penalised.

Questions which ask students to show working

Instructions on marking will be given but usually marks are not awarded to students who show no working.

Questions which do not ask students to show working

As a general principle, a correct response is awarded full marks.

Misread or miscopy

Students often copy values from a question incorrectly. If the examiner thinks that the student has made a genuine misread, then only the accuracy marks (A or B marks), up to a maximum of 2 marks are penalised. The method marks can still be awarded.

Further work

Once the correct answer has been seen, further working may be ignored unless it goes on to contradict the correct answer.

Choice

When a choice of answers and/or methods is given, mark each attempt. If both methods are valid then M marks can be awarded but any incorrect answer or method would result in marks being lost.

Work not replaced

Erased or crossed out work that is still legible should be marked.

Work replaced

Erased or crossed out work that has been replaced is not awarded marks.

Premature approximation

Rounding off too early can lead to inaccuracy in the final answer. This should be penalised by 1 mark unless instructed otherwise.

Continental notation

Accept a comma used instead of a decimal point (for example, in measurements or currency), provided that it is clear to the examiner that the student intended it to be a decimal point.

	Additional Guidance	
15 cont	If answer line blank allow $\frac{3}{4}$ to be indicated by eg circling the correct fraction	
	Allow $\frac{3}{4}$ to be given as a correct equivalent form eg Alt 1 0.75 and 1.3 and answer 0.75	M1A1
	Ignore + or – when calculating difference from 1 eg Alt 2 accept 0.25 and –0.3 or –0.25 and 0.3 or –0.25 and –0.3	
	In Alt 1 if further work is seen eg to calculate the differences then these must be correct and comparable for the A1 eg 0.75 and 1.3 and 25 and 30 (correct change to %) Answer $\frac{3}{4}$ eg 0.75 and 1.3 and 0.25 and 30 (not comparable) Answer $\frac{3}{4}$ eg 0.75 and 1.3 and 0.15 and 0.3 (one incorrect) Answer $\frac{3}{4}$	M1A1 M1A0 M1A0
	Diagrams are acceptable if clear eg  and answer $\frac{3}{4}$	M1A1
	NB the reciprocal of $\frac{3}{4}$ is 1.3… which may be seen truncated to 1.3	M0
	1 – 0.75 = 0.25, 1 + 0.25 = 1.25 and 1.3 seen and answer $\frac{3}{4}$	M1A1
	1.3 – 1 = 0.3, 1 – 0.3 = 0.7 and 0.75 seen and answer $\frac{3}{4}$	M1A1
	Alt 3 eg $\frac{15}{20}$ and $1\frac{6}{20}$ and answer $\frac{3}{4}$	M1A1

Question	Answer	Mark	Comments
20(a) cont	**Alternative method 2** shown by unit conversion and valid calculation		
	150 000 cm or 300 m or 0.05 m	M1	correct units must be shown to imply use of 100
	150 000 cm **and** 30 000 × 5 = 150 000 or 150 000 cm **and** 150 000 ÷ 5 = 30 000 or 150 000 cm **and** 150 000 ÷ 30 000 = 5 **and** *AB* = 5 or 30 000 cm **and** 300 m **and** 1500 ÷ 5 = 300 or 30 000 cm **and** 300 m **and** 300 × 5 = 1500 or 30 000 cm **and** 300 m **and** 1500 ÷ 300 = 5 **and** *AB* = 5 or 0.05 m **and** 1500 ÷ 0.05 = 30 000 or 0.05 m **and** 30 000 × 0.05 = 1500	A1	correct units must be shown
	Additional Guidance		
	30 000 × 5 may be seen as a correct build-up ie 30 000, 60 000, 90 000, 120 000, 150 000		
	Measuring *AB* as a value other than 5 will score M1 max		
	Using *AC* or *BC* can only score a max of M1 for one of the calculations or conversions that does not use *AB*		
	Allow M1 even if seen among other incorrect work but for A1 their method must be all correct and unambiguous		
	Must show a calculation from Alt 1 or a value with units from Alt 2 for the M1 ie 150 000 only or 300 only or 0.05 only is M0		
	Ignore any additional reference to the grid having 100 squares

20(b) cont	**Additional Guidance**	
	Answer only in range [1.32, 1.38]	B1M1M1A1
	Answer must match their *AC* if seen	
	Must be using the scale 1 : 30 000 or 5 : 1500	
	Their [4.4, 4.6] is often 4 (perhaps counting squares crossed diagonally) or 6 (perhaps 2 down and 4 across)	
	4 seen and answer 1.2	B0M1M1A1ft
	4 seen and 120 000 (by Alt 1) or 4 seen and 1200 (by Alt 2)	B0M1M0A0
	Answer 1.2 (without 4 seen)	Zero
	6 seen and answer 1.8	B0M1M1A1ft
	6 seen and 180 000 (by Alt 1) or 6 seen and 1800 (by Alt 2)	B0M1M0A0
	Answer 1.8 (without 6 seen)	Zero
	4.7 seen and answer 1.41	B0M1M1A1ft
	4.7 seen and 141 000 (by Alt 1) or 4.7 seen and 1410 (by Alt 2)	B0M1M0A0
	Answer 1.41 (without 4.7 seen)	Zero
	Using Pythagoras gives $AC = \sqrt{20}$ or $2\sqrt{5}$ or 4.4(72…) or 4.5	B1

21	2 and 7 or 2 and 13 or 2 and 19	B2	either order B1 any pair of **different** numbers chosen from 2, 3, 5, 7, 11, 13, 17, 19 eg 2 and 3 or 3 and 5
	Additional Guidance		
	Mark the answer line but, if answer line blank, the pair of numbers must be clearly selected for B2 or B1		
	List of prime numbers without selecting a pair		B0

22	9 × 5 or 45 or 9 × 3 or 27 or 5 × 3 or 15	M1	may be multiplied by 2 implied by 90 or 54 or 30 or (total =) 174 or 90 + 54 + 30 = 174
	9 × 5 × 2 or 90 **and** 9 × 3 × 2 + 5 × 3 × 2 or 54 + 30 or 84 or 9 × 5 or 45 **and** 9 × 3 + 5 × 3 or 27 + 15 or 42	M1dep	accept blue = 90 and (total =) 174 or green = 84 and (total =) 174
	90 and 84 and Yes or 45 and 42 and Yes	A1	oe condone incorrect units
	Additional Guidance		
	Yes may be seen by the question or implied by eg blue is bigger		
	Ticking or circling blue or 90 without a comment does not imply Yes		
	Allow M1 even if not subsequently used		
	Allow M1 even if seen among other calculations for eg perimeter or volume		
	Works out the area of a face and then uses this for the 'volume' eg 5 × 3 = 15, 15 × 9 = 135 or 5 × 3 = 15, 15 × 15 = 225		M1M0A0
	Only works out a 'volume' with correct or incorrect method eg 5 × 3 × 9 = 135 or 5 × 3 × 5 × 3 = 225		M0M0A0
	Ignore incorrect subtraction eg 90, 84 and Yes blue is 8 greater		M1M1A1
	90 + 54 + 30 = 174 (174 ÷ 2 = 87) 90 is more than half so Yes or 84 is less than half so Yes		M1 M1A1
	Only 90 and 174 without identifying 90 as the blue area		M1M0A0

24	720	B2	B1 at least 3 multiples of 120 (> 120) and at least 3 multiples of 144 (> 144) eg 240 360 480 and 288 432 576 or (120 =) 2 × 2 × 2 × 3 × 5 or (144 =) 2 × 2 × 2 × 2 × 3 × 3 or (Answer =) 2 × 2 × 2 × 2 × 3 × 3 × 5 or (Answer =) $2^4 \times 3^2 \times 5$ or (Answer =) any multiple of 720 (> 720) eg 1440 or 17 280

Additional Guidance	
Prime factor responses for B1 may be in index form eg (120 =) $3 \times 5 \times 2^3$	B1
Prime factor responses for B1 may be seen on a factor tree or a Venn diagram or in repeated division eg1 2 2 2 3 5 on a factor tree for 120 eg2 2 2 2 2 3 3 inside one circle on a Venn diagram	B1 B1
For B1 allow some incorrect multiples if 3 correct of each eg1 240 380 480 720 900 (3 correct) and 288 432 576 868 (3 correct) eg2 Answer 1440 but some incorrect multiples seen	B1 B1
Any multiple of 720 (> 720) given in unsimplified form eg1 $2^7 \times 3^3 \times 5$ eg2 2 × 2 × 2 × 2 × 2 × 5 × 3 × 3	B1 B1
B1 can still be awarded even if subsequently works out HCF	
Answer 720 with some incorrect multiples seen	B2
For products of prime factors, ignore inclusion of × 1

Additional Guidance

Condone fraction line for B2 or B1 eg $\left(\frac{11}{19}\right)$	B2
Answer $\begin{pmatrix}11\\m\end{pmatrix}$ must have m as a numerical value	
Answer $\begin{pmatrix}n\\19\end{pmatrix}$ must have n as a numerical value	
Must see the vector brackets to award any marks in the working eg $\begin{matrix}11\\19\end{matrix}$ or $\frac{11}{19}$ or $\begin{matrix}6+5\\21-2\end{matrix}$ or $\begin{matrix}6\\21\end{matrix}$	B0
Unsimplified version may be awarded in the working but must be seen as a single vector eg $\begin{pmatrix}6+5\\21-2\end{pmatrix}$	B1
$\begin{pmatrix}6\\21\end{pmatrix}$ may be awarded in the working if seen as a vector	B1
