Higher Tier

Paper 3 Calculator

Monday 11 November 2019 Afternoon

Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator
- mathematical instruments.

Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

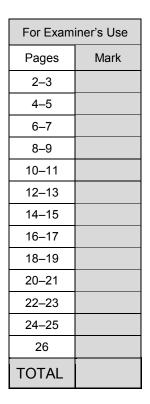

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.

Advice

In all calculations, show clearly how you work out your answer.

The floor is a rectangle with length 600 cm and width 240 cm Each tile is a square with side 40 cm

Tom uses this method to work out the number of tiles he needs.

| Number of tiles that will fit along the length = = | 600 ÷ 40 15 |
|---|----------------|
| Number of tiles that will fit along the width = = | 240 ÷ 40 6 |
| | 15 + 6 21 |

Give a reason why Tom's method is wrong.

21 Juice is sold in small bottles and large bottles. The volume of the large bottle is 1125 ml.

volume of small bottle : volume of large bottle = 2:5

A café has small glasses and large glasses.

volume of small glass : volume of large glass = 4:7

A small bottle fills 6 small glasses with no juice left over.

How many large glasses can be filled by a large bottle? You **must** show your working.
